Hiring Manager

HR Department

REFERENCE: **Application for IT Support**

Dear HR Department,

I am writing to express my strong interest in the IT Intern position at. With a Bachelor of IT Engineering from the Royal University of Phnom Penh and advanced, ongoing networking and cybersecurity training at Sunrise Institutes, I am eager to bring my proactive approach to system monitoring and network availability to your team.

In my previous role providing IT Support at MYFM News, I deliver daily technical assistance, resolve end-user hardware and software issues, and ensure the continuous operation of mission-critical broadcasting equipment. This hands-on background has equipped me with the practical skills needed to support employees effectively, from troubleshooting network connectivity to configuring printers, managing IT assets, and setting up end-user workstations.

Furthermore, your requirement for configuring and supporting LAN, WAN, and Internet systems aligns perfectly with my recent technical projects. Through my CCNA coursework, I have engineered high-availability network architectures, configured secure Inter-VLAN routing, and implemented enterprise routing protocols like OSPF and HSRP. I am highly comfortable monitoring network availability, performing proactive system reconfigurations, and executing secure hardware deployments.

I am fully bilingual in Khmer and English, which allows me to provide clear, effective technical training and support to diverse users. Whether the task involves executing routine data backups, managing email onboarding, or monitoring security camera

availability, I am dedicated to maintaining a secure and efficient IT environment that aligns with company guidelines. Thank you for your time and consideration.

Sincerely,

Vong Sahaknit
