SKILLS

- Networking: LAN/WAN Configuration, Network Monitoring, Wi-Fi Setup.
- Hardware & Peripherals: Print Server Setup, UPS Battery Maintenance, Laser/Ink Printer Refilling, Hardware Diagnostics

Professional Summary

A dedicated IT professional with a Bachelor of IT Engineering and advanced CCNA networking training, seeking an IT Support to support mission-critical systems and network availability. Experienced in providing hands-on end-user technical support, diagnosing hardware issues, and maintaining equipment. Possesses practical lab experience in configuring LAN/WAN architectures, enterprise routing, and high-availability protocols. Currently expanding my technical foundation with active coursework in cybersecurity, bringing a security-first mindset to network monitoring, data backups, and IT asset management. Highly capable of assisting with complete IT life cycles, from employee onboarding and email administration to configuring security cameras. Bilingual in Khmer and English, offering a proactive, collaborative approach to enforcing IT policies and ensuring seamless infrastructure operations.

EDUCATION

Kampong Chhnang high
school
2019 | Kampong Chhnang

HIGH SCHOOL DIPLOMA

Royal University of Phnom
Penh
2023 | Phnom Penh

BACHELOR OF IT ENGINEERING

ETEC CENTER
2023 | Phnom Penh

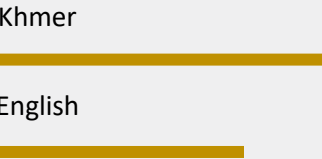

PROJECT COURSES

Sunrise institutes
2024 | Phnom Penh

CCNA COURSES

- Systems & Security: Windows/Linux OS Installation, Antivirus/Defragmentation Management, Backup Scheduling, Security Camera Monitoring,
- **User Support:** IT Onboarding/Offboarding, Email Account Administration,
- Social media platform: manage and control social media page
- security and network: basic knowledge with network and security
- Problem-Solving: Strong analytical and problem-solving skills
- Time Management: Effective prioritization of tasks Proven ability to meet deadlines

An informational website designed for the Ministry of Information in Kampong Chhnang Province, Cambodia.

Technical Lab & Practical Experience

Small Enterprise Network Architecture (CCNA Final Project)

AUG 2025 | Sunrise institutes

I designed and deployed a multi-tier enterprise network, logically segmenting internal traffic into dedicated VLANs for distinct departments such as HR, Marketing, and IT. To facilitate fast and reliable communication across the network, I configured EtherChannel between access switches and set up Layer 3 Switch Virtual Interfaces (SVIs) for seamless Inter-VLAN routing. Furthermore, I ensured overall network stability and eliminated Layer 2 switching loops by successfully implementing Per-VLAN Spanning Tree Plus (PVST+).

High-Availability Enterprise Network Architecture (CCNA Physical Lab)

AUG 2025 | Sunrise institutes

I engineered a highly available enterprise network by configuring Hot Standby Router Protocol (HSRP) across multiple Cisco routers, creating a redundant default gateway to ensure continuous connectivity. I segmented the network using a multi-VLAN architecture with 802.1Q

COURSES

Information Technology Engineering

Jan 2022 - Jun 2022

Etec Center

Dec 2021 - Feb 2022
